

# Site Separation Works Phase 1: Link Building Demolition

 **Banbury**

 **£600k**

 **20 weeks**

Following several years working with on this site, we were invited by our client to undertake the demolition of an existing building linking two factory buildings in a controlled manner. The work was on top of an existing slab including service isolations and removal, the removal and Licensed disposal of all demolition waste arising from the works and provision of site segregation.

This project was completed on a fully live production site and segregation of the works from the client's employees, visitors and production areas was paramount, as was ensuring that their logistics could continue in an efficient manner.

## Scope of works included:

- Demolition of Link Building
- Asbestos Removal
- Services Isolation & Strip Out
- Temporary Protection & Waterproofing
