

Conference & Display Centre

 **Banbury**

 **£900k**

 **16 weeks**

Working for this high profile coffee manufacturer, we were employed to develop the concept through to detailed design and refurbishment of their R&D centre, including conference facilities.

The project included the strip out of the existing facility, alterations and extension to the existing mezzanine floor, fit out of ground and first floor laboratories, conference area and toilets across 1,034 m2.

The project was completed on site in 16 weeks and delivered on time and to budget.

We worked with the client to ensure its conference facilities were flexible to accommodate 80, 160, 240 or 272 people in theatre style.

The corridors were utilised as display areas for branding, corporate messages and company information, giving a welcoming feel but also to ensure the facility could be used to maximum affect for customers, suppliers, employees and other guests.
