

New Chocolate Tank Farm

 Newcastle

 £850k

 Various

Working for one of the largest food companies in the world, this project is to encompass the refurbishment of an existing sports hall to house a new tank farm installation for chocolate and caramel. The refurbishment - which has to meet the high standards of cleanliness for food production - comprises a new concrete floor, mezzanine, internal rooms and removal of the existing tanks from a separate building.

We are working with the client's project management and design teams to identify the most efficient and effective method of construction whilst ensuring that the hygiene standards are maintained.

Working in a live factory environment, traffic management and security are of paramount importance, as is ensuring that the site – which is easily visible to the client's staff and visitors – is constantly tidy and projecting an image that reflects the values of the client.

The project is currently live and running to budget and on programme.
