

New Office, Design Studio, Conference and Laboratory Facilities

 **Birmingham**

 **£800k**

 **12 weeks**

The client on this project is a large multinational confectionary manufacturer. We were employed to provide the concept and in-house design of the 4th floor of one of their buildings.

Based on a briefing by the client, we developed the concept designs before working up 3D models and detailed design, which was approved and priced prior to commencement.

The project required the complete refurbishment of the area to create a multifunctional workspace, including:

- New office area expansion to accommodate employees & visitors
- Design studio with custom built feature “wood effect” ceiling with built-in information screen.
- Analytical Research and Development Laboratory facilities including fume cupboards
- Sample Packaging Laboratory including new plotter and spray booth
- Conference “Town Hall” multifunctional area with three new multi-functional projectors
- Sound proof folding wall screen to create private meeting room area with conference space
