

Data Services

Business Broadband

High performance broadband with a choice of fast download and upload speeds to suit your business.

- The best high quality business broadband packages based on next generation network connectivity
- New Superfast Fibre broadband now available up to 80MB with consistently high performance
- Complete data package, including IP addressing and routers, or wires-only service
- Proactive monitoring of your connection

How it works

Our data services have been specifically designed to utilise the latest network connectivity, ensuring that we are in full control of how traffic is routed over the network. With this control and flexibility we are able to offer a complete portfolio of different upload and download speeds along with charging methods tailored for your company's broadband use.

We're able to provide a complete 'out of the box' solution with router fulfilment, microfilters, IP addressing and any core connections required such as physical telephone lines. If you already have equipment and wish to reuse this with our wires only service, we can assist in getting you up and running with the connection you require

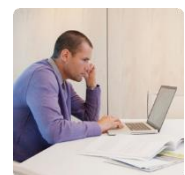

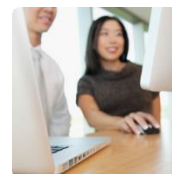

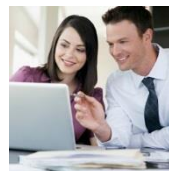

Choose the right Broadband for your business

	SMALL OFFICE HOME OFFICE	DOWN UP TO 8MB	UP TO 1.3MB
	SMALL - MEDIUM OFFICE	DOWN UP TO 24MB	UP TO 1.3MB
	MEDIUM - LARGE OFFICE	DOWN UP TO 80MB	UP TO 20MB

Fair Usage Policy applies.
Choice of contract terms available.

Benefits

- Business-grade broadband
- Highly competitive pricing
- Save money by reusing existing equipment and only using the bandwidth your business requires
- Use the same supplier for all your telephone and data requirements - your critical business connections will be in one place with an experienced business communications supplier.
